Mariam Hussein

Front-End Engineer | *React.js · TypeScript · Next.js · Angular*

6 October City, Cairo | mariamhussein.dev@gmail.com | +20 100 505 3889 | linkedin.com/in/mariamhusseindev | github.com/mariamhus

PROFILE

Front-End Engineer with 3+ years of experience building scalable SaaS platforms, real-time monitoring systems, and data-intensive dashboards with React.js, TypeScript, Next.js, and Angular. Skilled in frontend architecture, reusable component systems, performance optimization, and accessible, semantic UI development, with a track record of leading code reviews and mentoring junior engineers in fast-paced Agile teams. Strong background in data analytics and visualization, translating complex business requirements into intuitive, data-driven user experiences.

PROFESSIONAL EXPERIENCE

Front-End Developer — Nexey 08/2025 – Present

Qesm El Maadi, Cairo

- Own frontend architecture decisions for a real-time workforce monitoring platform, establishing scalable patterns for state management, API integration, and reusable UI development.
- Building the Workforce Management (WFM) module, a standalone sub-application inside the Nexey dashboard with its own layout, navigation, permission-based routing, and full English and Arabic (RTL) support.
- Build reusable UI components and shared design patterns, including data tables with inline filters, pagination, dialogs, and summary cards, to keep modules consistent and accelerate feature delivery.
- Apply advanced React patterns (custom hooks, context composition, lazy loading, and code splitting) and optimize rendering for data-intensive dashboards through memoization and efficient state management.
- Apply accessibility best practices, including semantic HTML and keyboard navigation, and test across major browsers and devices to ensure a polished, reliable user experience.

IT Service Desk — VOIS 12/2023 – 08/2025

Smart Village, Cairo

- Spearheaded the design and implementation of a full-cycle automated KPI reporting solution (Power Automate, Python, Power BI), eliminating manual data collection across multiple tools and cutting report generation time from 4+ hours to under 10 minutes.
- Enhanced data accuracy and consistency, reducing manual errors and standardizing KPIs across teams.
- Automated distribution of reports via Outlook, ensuring timely delivery to all stakeholders with zero manual effort.
- Provided technical support to internal users and acted as the communication bridge between users and backend technical teams, managing multiple concurrent support requests.

React.js Developer — TEQNEIA 03/2023 – 12/2023

Sheikh Zayed, Giza

- Led and mentored 8 frontend interns, conducting code reviews, resolving technical challenges, and promoting frontend engineering best practices.
- Defined project structure and development standards to ensure maintainability, scalability, and consistent coding practices across the team.
- Participated in sprint planning, effort estimation, and task breakdown to ensure predictable delivery and effective collaboration.
- Collaborated with product owners and stakeholders to translate business requirements into scalable frontend solutions.

MEARN Intern — Intensive Training Program – ITI 12/2022 – 05/2023

Cairo Branch

Completed an intensive Full-Stack Web Development (MEARN) training program at the Information Technology Institute, covering front-end development with Angular and React and back-end development with Node.js and Express, building a solid foundation for tackling complex projects.

EDUCATION

BA in Computer Science, October 6 University 2019 – 2022
Intensive Training Program – ITI, MEARN Track 12/2022 – 05/2023

SKILLS

Frontend & Architecture: React.js, Next.js (App Router, Server Components, Server Actions), Angular (Signals, CDK), TypeScript, JavaScript (ES6+), Redux Toolkit / RTK Query, TanStack Query, React Router, HTML5, CSS3, SASS, Tailwind CSS, Material UI, Ant Design, Frontend Architecture, Design Systems, Performance Optimization, Lazy Loading, Accessibility (semantic HTML, keyboard navigation), Internationalization (RTL)

Data Visualization: Chart.js, Recharts, Power BI, Tableau

Testing & Tooling: Vitest, Manual Cross-Browser & Device Testing, ESLint, Vite, Git/GitHub, Postman, Vercel

Backend & Data: Node.js, Express, MongoDB, MySQL, Python, Spring MVC, Zod

PROFESSIONAL PROJECTS

Workforce Management (WFM) Module — Nexey

- Built end-to-end management flows for clients, contacts, contracts, employees, and roles: list pages with inline column filters, search, and pagination; detail pages; and multi-tab add and edit forms.
- Implemented contract lifecycle features, including status changes driven by a transition matrix, auto-renewal settings, and server validation errors routed to the matching form field and tab.
- Integrated REST APIs with RTK Query using TypeScript types built from real API responses, and localized every screen in English and Arabic with RTL layouts.
- **Tech:** React.js, TypeScript, Redux Toolkit / RTK Query, React Router v6, i18n, REST APIs.

Real-Time Workforce Monitoring & IT Operations Platform — Nexey

- Built complex React and TypeScript dashboards visualizing user activity, application usage, device health, productivity metrics, and organizational insights, with reusable data-visualization modules.
- Implemented automation-management interfaces for administrators to configure and run remediation workflows across managed devices.
- Integrated remote support and device management via RustDesk, enabling secure remote assistance and operational intervention.
- **Tech:** React.js, TypeScript, Redux Toolkit, Chart.js, Tailwind CSS, Ant Design, REST APIs, Real-Time Analytics.

E-Commerce Dashboard & Storefront (Multi-Tenant SaaS)

- Developed a multi-tenant admin dashboard with category and product management, staff task assignment, and interactive analytics charts, plus a companion storefront with Gediea API payment integration.
- **Tech:** React, TypeScript, Vite, Redux Toolkit, JWT, Ant Design, Material UI, Tailwind CSS.

LMS E-Learning System — MindsOn

- Built a Learning Management System for instructors to upload and manage video lectures, tests, and course materials, with a React and Material UI front end and a Node.js, Express, and MongoDB back end.

Freelance — Gaming Landing Page, "Palynation"

- Built a single-page landing site for a gaming tool using React, TypeScript, Tailwind, and Redux Toolkit.

PERSONAL PROJECTS

Art Print Store — Next.js 16, React 19, TypeScript, Zod, Tailwind CSS

- E-commerce storefront with server components, statically generated product pages with SEO metadata and generated share images, URL-based filters, a persistent cart, and a checkout server action that re-validates prices on the server.

Kanban Board — Angular 21, TypeScript, Signals, Angular CDK, Vitest

- Drag-and-drop task board with column reordering, work-in-progress limits, filters, typed reactive forms, undo, and a signals-based store covered by unit tests.

Movie Search App — React, TypeScript, React Router, TanStack Query moviesearch-swart-beta.vercel.app

- Movie browser built on the TMDB API with debounced, URL-synced search, infinite scroll, detail pages with trailers and cast, and a watchlist synced across tabs.

Expense Tracker — React, TypeScript, Recharts, Tailwind CSS expense-tracker-one-bay-13.vercel.app

- Budget tracker with a category breakdown, a day-by-day spending chart, month history, undo, and CSV export, with amounts stored in cents to avoid rounding errors.

Markdown Notes — React, TypeScript, marked, DOMPurify

- Notes app with a live split preview, formatting shortcuts, hashtag filtering, clickable checklists, export to Markdown, and sanitized rendering.

Weather Dashboard — React, TypeScript, Open-Meteo API, Tailwind CSS weather-dashboard-eight-cyan.vercel.app

- City search with an accessible combobox, geolocation, current conditions, and 24-hour and 7-day forecasts, with a panel that takes on the color of the sky.

Pomodoro Timer — React, TypeScript, Web Audio API, Tailwind CSS pomodorotimer-sand.vercel.app

- Focus timer with drift-free timing, a reducer-based state machine, sound alerts, desktop notifications, keyboard shortcuts, and weekly stats.

COURSES & CERTIFICATIONS

Next.js — Udemy 04/2025 – Present

Data Analyst Professional — Epsilon AI Institute 12/2023 – 04/2024

- Built interactive dashboards and reports with Excel, Power BI, and Tableau; analyzed complex datasets for data-driven decisions.

Data Scientist Professional — Epsilon AI Institute 10/2022 – 09/2023

- Applied Python and OOP to build and deploy ML models (Dash, Streamlit) for data-driven predictions and insights.
